

# Harrison Street Sidewalk Project

## Field Survey and Design Planned

### Project

#### Description:

Fieldwork is scheduled to begin during the week of Feb. 2, weather permitting, to collect survey data for the design of the Harrison Street Sidewalk Project. The City of Rockville has contracted with *Rummel, Klepper and Kahl, LLP (RK&K)* for professional surveying and engineering services for this project. An RK&K survey crew will be on and around Harrison Street for several days. Survey data collection is the first step of the project, and is necessary to complete the project planning and design.

*Miss Utility* will mark gas, telephone, cable and electric lines. City of Rockville Department of Public Works maintenance crews will mark sanitary sewer, storm drain, and water pipes. Various colored spray paint markings will delineate the utilities within the right-of-way.

After the utilities are marked, the RK&K survey crew will take ground shots on existing features such as driveways, front walks, lamp posts, landscaping, and trees. This topographical information is needed to fully consider existing conditions for the design. During this process, it may be necessary for the survey crew to access private property. If this is necessary, the survey crew will knock on the door to make their presence known. The City intends to carry out the survey work without inconvenience to you and without disturbance to your property. Your cooperation and patience through this process is greatly appreciated.

#### Purpose:

To improve pedestrian facilities by installing a sidewalk on Harrison Street, completing a sidewalk connection between Nelson Street and Rockville Town Center.

### Project

#### Notifications:

Notification of a public meeting, to be held once the sidewalk alignment and preliminary design have been established, will be sent in another advisory. Emails from community members regarding the project are being forwarded to RK&K for consideration as we start the project. The City staff members listed below are available to discuss the project at any time.
